

Looking for more videos

We're looking for links to more video clips. There are many narrow categories. If your video(s) fit a category, [please submit them](#) by mail or Facebook message.

If there's a category we haven't thought of, please submit that too.

Submit your own stuff or videos by favorite actors, filmmakers or musicians - as long as there are Native Americans in them or a Native American theme.

Please try and find the best version of each video, and if you have the release year, that would be nice. Also if you know who's in videos that don't have that info visible on the video site, please include that too.
